

### Miniature Diaphragm Metering Pumps

Incorporate one of these miniature diaphragm metering pumps into your machine or analyzing instruments for low flow liquid or gas sampling and transfer. Integration is simple with the small size and power requirements of these unique little pumps. These self-priming pumps can run dry for extended periods without damage.

Select from several models with the same flow rate, but different materials of construction. Connect tubing to the appropriate inlet or outlet and provide a DC power supply to begin. Low power requirements and small size are ideal for portable, battery-operated applications.

Vary flow by varying the input voltage. 12 VDC and 24VDC models are available in both brush and brushless varieties.

Continuous-duty. One year warranty.
